

Held-out human SL screens by cell-line ancestry

Frozen SLB-1.3 test predictions · Fitness-balanced AUROC within cell line and screen

Points show scores; whiskers are 95% gene-family bootstrap intervals.

AFR has 3 cell lines and 32 positive pairs; groups use different cancer types, screens and pair panels.

Genotype estimates: Dutil et al. (2019) via Cellosaurus; one EAS line is self-reported. Cell lines, not patients.
